

IM-4 Division

Support Equipment (SE) Division maintains the equipment used to start, service, load, lift, jack and move aircraft aboard the carrier. Common SE includes equipment varying from sophisticated jet turbine engines and state of the art electric generators to aircraft maintenance stands used by ten squadrons. Mobile Firefighting units and aircraft slings in the event of a crash onboard must always be ready. Forklifts also stay in constant demand. SE maintenance technicians are electricians (ASE) and mechanical (ASM) who "MAKE IT HAPPEN" aboard FID. There is "NO AIR SUPPORT WITHOUT GROUND SUPPORT".
